September 12, 2016

CIMCO Refrigeration, St. John's, has for many years been a service provider of the Msgr. Bartlett Memorial Arena. The service, professionalism and knowledge have been beyond exceptional in assisting with the arena operations.

During our 2014/15 ice season the CIMCO 600E-SC Infrared Control System was installed at the arena. The service of staff assisting with installation and equipment training was exceptional. CIMCO staff took the time to work with our staff during the complete process until we were fully comfortable with the operations of this new technology. They made the process very easy for staff adjustments.

This new equipment was installed as part of our energy savings plan in partnership with NL Power. Savings of \$7000.00 per year have been achieved due to this technology and NL Power has recognized this achievement in their advertisement, which a copy has been attached.

I and the arena staff would like to thank you and your staff for all you have done during this project.

Sincerely,

Hollie Neary
Arena/Recreation Manager
